

A Note on First Degree Stochastic Dominance

Lars P. Hansen, Charles A. Holt and Dan Peled

Economics Letters, 1978, 1, 315-319.

Abstract: A link is established between stochastic dominance and a different dominance relationship which we call pointwise dominance. This provides the basis for making several comparisons of expected values of non-decreasing functions of random variables. We discuss economic problems for which the application of stochastic dominance results depends on this link.
